

Replaceable Cartridge System with KDF/GAC Cartridge

H2O-RCT

Features of This Water Filter

- 5 stage filtration cartridge
- Installs in minutes without tools
- Fits any faucet – Adapters included
- Attractive design
- Swivel Long Reach Chromed Spout
- Bacteriostatic media: Prevents bacteria growth (algae, fungi)
- Improves taste and color.
- eliminates odors.
- Reduces most EPA listed contaminants
- Optional prefilter available
- Prorated warranty

The Solution to Water Pollution: Our systems contain a patented Bacteriostatic media,* KDF® (U.S. Patent 4,642,192), which has been tested to drastically reduce or effectively remove: Chlorine, Lead, Arsenic, Barium, Cadmium, Chromium, Selenium, Mercury, Iron and other metals that may be present in the water. KDF® is listed under NSF International Standard 61(Health effects) for water treatment plant

Laboratory tested
Made in the U.S.A.
* KDF®

The Coconut Shell Granular Activated Carbon is used to improve the taste, color and odor and to remove: Chlorine, THMs, PCBs and hundreds of other organic contaminants that may be present in the water.

- Max. Capacity:	5,000 gal / 18,900 L
- Recommended Flow :	0.5 to 1 gpm / 1.9 to 3.8 L/min
- Unit Height :	Unit Height: 12" / 30.5 cm
- Unit Width :	4.5" in diameter / 11.4 cm
- Unit Shipping Wt. :	4.3 lbs / 2.0 kg
- Master Case Dimensions :	26.5" x 18.5" x 12" 67.3 x 47 x 30.5 cm
- Unit Packing :	12 per master case
- Master Case Weight :	52 lbs. / 23.6 kg

* Founded in 1984, KDF® is a technological leader in the fluid treatment industry. Beginning with a U.S. patent for KDF® redox alloy media in 1987, the company continues its technological innovation. KDF® process media are high-purity copper-zinc formulations used in Pre-treatment, primary treatment, and wastewater applications. KDF® media supplement or replace existing technologies to dramatically extend system life, reduce heavy metals, microorganisms, scale, lower total cost, and decrease maintenance. Patented KDF® process media are 100 percent recyclable and contain no chemical additives. Hospitals, restaurants, municipal water treatment facilities, and homes rely on KDF® process media to safely reduce or remove chlorine, iron, hydrogen sulfide, heavy metals, and bacteria from their water.
